

Design

- Mr. McKibbon participated in a design team lead by G. O'Connor Consultants Inc., Landscape Architects, in the drafting of the Hamilton Recreational Trails Master Plan, 2006. The Master Plan provides a comprehensive plan and design for the development of a multi-use, off-road recreational trail system which incorporates measures to address emerging health concerns such as obesity and lifestyle issues as well as providing alternative transportation modes to the automobile in support of municipal transportation and land use planning objectives.
- Mr. McKibbon participated in a design team lead by G. O'Connor Consultants Inc., Landscape Architects, in the preparation of a report entitled "Waterfalls and Cascades of Hamilton, Phase 2 – Upgrades and Enhancements" (2006). The study focuses on those Niagara Escarpment Waterfalls in the City of Hamilton for the purposes of interpretive, recreational and tourism development. The work began in 2005 and was completed in 2006.
- Mr. McKibbon participated in an engineering and planning team intended to develop a major new pork processing plant in the City of Hamilton for Maple Leaf Foods in 2005. Beginning with a "green field" site, he worked with scientists and engineers to develop a site plan, zoning and severances application to meet biological, engineering and servicing requirements of the City and Province of Ontario. Unfortunately, the projects did not proceed, in part because of community response.
